

Canadian Journal of Ophthalmology

Journal canadien d'ophtalmologie

| | |
|---|---|
| Editeurs emeriti | Drs. C.C. Ewing, J.C. McCulloch, H.N. Reed |
| Editor-in-chief/Rédacteur en chef | Dr. D.W. Mills, 505-200 Queen's Ave., London, Ont. N6A 1J3 |
| Associate editor/Rédactrice associée | A. Bolster |
| Editorial board | Drs. D.J. Addison, I.S. Begg, J.R. Brunette, I.A. Chisholm, G. Côté, P.L. Davis, R.P. LeBlanc, J.F. Morgan, R.A. Morgan, R.J. Schneider, J.S. Speakman |
| Translation editor/Rédacteur à la traduction | Dr. J.R. Brunette |
| Book review editor/Rédacteur à la critique des livres | Dr. N.R. Willis |

Subjects

- Abnormalities:
 - Congenital absence of the inferior branch of the central retinal vein, Khalil M, 82-83
- Acetylsalicylic acid: see Aspirin
- Acid rain:
 - Effects of acidic lake water on the eye, Basu PK, et al, 74-78
- Adenocarcinoma:
 - Consecutive bilateral ocular metastases from an asymptomatic adenocarcinoma of the cardia, Rootman J, et al, 79-81
 - Factors affecting the survival of patients with lacrimal gland tumours, Wright JE, 3-9
- Age factors:
 - Early surgery for infantile esotropia: results and influence of age upon results, Zak TA, et al, 213-218
- Alpha adrenergic receptor blockers:
 - Thymoxamine versus pilocarpine in the reversal of phenylephrine-induced mydriasis, Saheb NE, et al, 266-267
- Amiodarone: see Benzofurans
- Anesthesia:
 - Controlled sedation, sphenopalatine and nasociliary blocks, and bloodless flap suturing in dacryocystorhinostomy, Mailer CM, et al, 189-193
- Aneurysm:
 - Spontaneous regression of retinal lesions in Coats' disease, Deutsch TA, et al, 169-172
- Angina pectoris:
 - Papilledema without peripheral neuropathy in a patient taking perhexiline maleate, Mandelcorn M, et al, 173-175
- Anterior chamber:
 - Preventing corneal autolysis after a donor's death, Basu PK, et al, 70-73
 - Sodium hyaluronate for postoperative aphakic choroidal detachment, Cadera W, et al, 274-275
- Antiarrhythmia agents:
 - Amiodarone-induced cornea verticillata, Chew E, et al, 96-99
- Antibiotics:
 - Distribution of penicillin in the cornea, tears and aqueous humour at various times following a single intravenous injection, Avaria M, et al, 21-23
 - Treatment of blepharitis and blepharoconjunctivitis: comparison of gentamicin-betamethasone, gentamicin alone and placebo, Jackson WB, et al, 153-156
- Anticoagulants:
 - Massive subretinal hemorrhage and anticoagulant therapy, Brown GC, et al, 227-230
- Aphakia:
 - Interlamellar refractive keratoplasty in rabbits, Sher JH, et al, 116-120
 - Prolonged-wear contact lenses (E), Morgan JF, 91-92
- Aqueous humour:
 - Distribution of penicillin in the cornea, tears and aqueous humour at various times following a single intravenous injection, Avaria M, et al, 21-23
 - Sodium hyaluronate for postoperative aphakic choroidal detachment, Cadera W, et al, 274-275
- Arterial occlusive diseases:
 - Bilateral occlusion of the central retinal artery associated with hyperglobulinemia in hairy cell leukemia, Goodman GK, et al, 124-127
- Arteriosclerosis:
 - Noninvasive tests for carotid atherosclerosis (E), Spence JD, 47-48
- Arthritis, rheumatoid:
 - Is ASA therapy for cataracts justified? (C), Seigel D, et al; Cotlier E, 135-137
- ASA: see Aspirin
- Ascorbic acid deficiency:
 - Subclinical vitamin C deficiency (C), Gillan JG, 137
 - Subclinical vitamin C deficiency (C), Sheppard N, et al, 44
- Aspergillosis:
 - Bilateral retinal infarction in disseminated aspergillosis, Johnson R, et al, 223-226
- Aspirin:
 - Is ASA therapy for cataracts justified? (C), Seigel D, et al; Cotlier E, 135-137
- Atherosclerosis: see Arteriosclerosis
- Autolysis:
 - Preventing corneal autolysis after a donor's death, Basu PK, et al, 70-73
- Benzofurans:
 - Amiodarone-induced cornea verticillata, Chew E, et al, 96-99
- Betamethasone:
 - Treatment of blepharitis and blepharoconjunctivitis: comparison of gentamicin-betamethasone, gentamicin alone and placebo, Jackson WB, et al, 153-156

- Benzofurans:
 - Amiodarone-induced cornea verticillata, Chew E, et al, 96-99
- Betamethasone:
 - Treatment of blepharitis and blepharoconjunctivitis: comparison of gentamicin-betamethasone, gentamicin alone and placebo, Jackson WB, et al, 153-156

- son of gentamicin-betamethasone, gentamicin alone and placebo, Jackson WB, et al, 153-156
- Blepharitis: see Eyelid diseases
- Blindness:
- Massive subretinal hemorrhage and anticoagulant therapy, Brown GC, et al, 227-230
 - Psychologic management of loss of vision, Rakes SM, et al, 178-180
- Blood pressure:
- Risk factors for progression of visual field defects in medically treated patients with glaucoma, Richler M, et al, 245-248
- Calgary Code:
- The Calgary Code: a numerical and alphabetical nosography of retrolental fibroplasia, Hindle NW, 110-112
- Canadian Journal of Ophthalmology:
- Another step forward (E), Mills D, 1
- Canaliculi:
- Treatment of canalicular obstructions, Hurwitz JJ, 13-16
- Candida albicans*:
- Bilateral *Candida albicans* dacryocystitis with facial cellulitis, Codère F, et al, 176-177
- Carotid artery diseases:
- Noninvasive tests for carotid atherosclerosis (E), Spence JD, 47-48
- Cataracts:
- Is ASA therapy for cataracts justified? (C), Seigel D, et al; Cotlier E, 135-137
 - Modelling cortical cataractogenesis: 3. In vivo effects of vitamin E on cataractogenesis in diabetic rats, Ross WM, et al, 61-66
- Cataract extraction:
- Flexible-loop posterior chamber artificial lenses (E), Dyson C, 141-142
 - On being an old dog (E), Mills D, 187-188
 - Subconjunctival phacocoele: an unusual complication of cataract surgery, Sassani JW, et al, 128-131
- Cellulitis:
- Bilateral *Candida albicans* dacryocystitis with facial cellulitis, Codère F, et al, 176-177
 - Unilateral proptosis in Nigerians: causes and differential diagnosis, Majekodunmi S, 203-206
- Child:
- Early surgery for infantile esotropia: results and influence of age upon results, Zak TA, et al, 213-218
- Choroid:
- Sodium hyaluronate for postoperative aphakic choroidal detachment, Cadera W, et al, 274-275
- Choroidal detachment:
- Sodium hyaluronate for postoperative aphakic choroidal detachment, Cadera W, et al, 274-275
- Classification:
- The Calgary Code: a numerical and alphabetical nosography of retrolental fibroplasia, Hindle NW, 110-112
 - Clinical electroretinography. Part 2: Applications, Brunette JR, 239-244
 - International classification of retrolental fibroplasia: a proposal, Hindle NW, 107-109
- Coats' disease: see Retinal diseases
- Coccidioidomycosis:
- Macular coccidioidomycosis, Lamer L, et al, 121-123
- Congenital defects: see Abnormalities
- Conjunctiva:
- Subconjunctival phacocoele: an unusual complication of cataract surgery, Sassani JW, et al, 128-131
- Conjunctivitis:
- Ocular manifestations of Kawasaki disease (mucocutaneous lymph node syndrome), Jacob JL, et al, 199-202
- Contact lenses:
- Interlamellar refractive keratoplasty in rabbits, Sher JH, et al, 116-120
 - Prolonged-wear contact lenses (E), Morgan JF, 91-92
- Cornea:
- Corneal epithelial cells can engulf particulate matter (C), Basu PK, 44-45
 - Distribution of penicillin in the cornea, tears and aqueous humour at various times following a single intravenous injection, Avaria M, et al, 21-23
 - Effects of radial and circular keratotomy in rabbits, Kiskis AA, et al, 161-164
 - Epithelial downgrowth after penetrating keratoplasty, Sidrys A, et al, 29-31
 - Interlamellar refractive keratoplasty in rabbits, Sher JH, et al, 116-120
 - Preventing corneal autolysis after a donor's death, Basu PK, et al, 70-73
- Corneal diseases:
- Amiodarone-induced cornea verticillata, Chew E, et al, 96-99
 - Meesmann's corneal dystrophy: ultrastructural features, Tremblay M, et al, 24-28
- Corneal dystrophies:
- Meesmann's corneal dystrophy: ultrastructural features, Tremblay M, et al, 24-28
- Cryoretinopathy: see Cryotherapy
- Cryotherapy:
- Anterior segment necrosis following cyclocryotherapy, Sharp DC, et al, 268-270
 - Cryoretinopathy for proliferative diabetic retinopathy, Ramsay RC, et al, 17-20
 - Cryotherapy for retinopathy of prematurity to prevent retrolental fibroplasia, Hindle NW, 207-212
- Cycloplegics: see Mydriatics
- Dacryocystitis:
- Bilateral *Candida albicans* dacryocystitis with facial cellulitis, Codère F, et al, 176-177
 - Controlled sedation, sphenopalatine and nasociliary blocks, and bloodless flap suturing in dacryocystorhinostomy, Mailer CM, et al, 189-193
- Dacryocystography:
- Functional obstruction of the lacrimal drainage passages, Rosenstock T, et al, 249-255
- Dacryocystorhinostomy: see Surgery
- Diabetes mellitus:
- "Early" vitrectomy for vasoproliferative retinopathy in patients with insulin-dependent diabetes mellitus, Shea M, et al, 150-152
 - Modelling cortical cataractogenesis: 3. In vivo effects of vitamin E on cataractogenesis in diabetic rats, Ross WM, et al, 61-66
 - Risk factors for progression of visual field defects in medically treated patients with glaucoma, Richler M, et al, 245-248
- Diabetic retinopathy:
- Cryoretinopathy for proliferative diabetic retinopathy, Ramsay RC, et al, 17-20
 - "Early" vitrectomy for vasoproliferative retinopathy in patients with insulin-dependent diabetes mellitus, Shea M, et al, 150-152
 - Ocular deposits of immunoglobulin in diabetic retinopathy (C), Melato M, et al, 45-46
- Diagnosis:
- Clinical electroretinography. Part 2: Applications, Brunette JR, 239-244
- Diagnosis, differential:
- Unilateral proptosis in Nigerians: causes and differential diagnosis, Majekodunmi S, 203-206
- Dissociated vertical deviation:
- Dissociated vertical deviation: associated findings and results of surgical treatment, Noel LP, et al, 10-12
 - Vanishing infantile esotropia, Clarke WN, et al, 100-102
- Dog-bite syndrome:
- Dog-bite syndrome: an approach to its management, Wise J, et al, 262-265

Drug therapy:

- Accidental cycloplegia with Transderm-V therapy (C), Flora PG, 135
- Amiodarone-induced cornea verticillata, Chew E, et al, 96-99
- Massive subretinal hemorrhage and anticoagulant therapy, Brown GC, et al, 227-230
- Papilledema without peripheral neuropathy in a patient taking perhexiline maleate, Mandelcorn M, et al, 173-175
- Thymoxamine versus pilocarpine in the reversal of phenylephrine-induced mydriasis, Saheb NE, et al, 266-267
- Treatment of blepharitis and blepharoconjunctivitis: comparison of gentamicin-betamethasone, gentamicin alone and placebo, Jackson WB, et al, 153-156
- DVD: see Dissociated vertical deviation

Electrodes:

- Method for recording a pattern electroretinogram of the macula, Galbraith DJ, et al, 165-168

Electrodiagnosis:

- Resistance in clinical electroretinography: its role in amplitude variability, Lemagne J-M, et al, 67-69

Electronics, medical:

- Resistance in clinical electroretinography: its role in amplitude variability, Lemagne J-M, et al, 67-69

Electro-oculography:

- Clinical electroretinography. Part 1: Foundations, Brunette JR, 143-149

Electroretinography:

- Clinical electroretinography. Part 1: Foundations, Brunette JR, 143-149
- Clinical electroretinography. Part 2: Applications, Brunette JR, 239-244
- Electroretinographic evidence of miosis-induced peripheral ring scotoma, Brunette JR, et al, 113-115
- Method for recording a pattern electroretinogram of the macula, Galbraith DJ, et al, 165-168
- Resistance in clinical electroretinography: its role in amplitude variability, Lemagne J-M, et al, 67-69

Endocrinology:

- Tests of thyroid function important to the ophthalmologist, Hurwitz JJ, 49-52

Endophthalmitis:

- Management of infective endophthalmitis by pars plana vitrectomy, Harris GS, et al, 194-198

Epiphora:

- The broken Lester Jones tube, Doucet TW, et al, 32-33
- Functional obstruction of the lacrimal drainage passages, Rosenstock T, et al, 249-255
- Treatment of canalicular obstructions, Hurwitz JJ, 13-16

Epithelium:

- Corneal epithelial cells can engulf particulate matter (C), Basu PK, 44-45
- Epithelial downgrowth after penetrating keratoplasty, Sidrys LA, et al, 29-31

Ergonomics: see Human engineering

Esotropia: see Strabismus

Exophthalmos:

- Tests of thyroid function important to the ophthalmologist, Hurwitz JJ, 49-52

Exudates and transudates:

- Spontaneous regression of retinal lesions in Coats' disease, Deutsch TA, et al, 169-172

Eye:

- Effects of acidic lake water on the eye, Basu PK, et al, 74-78

Eye, artificial:

- Flexible-loop posterior chamber artificial lenses (E), Dyson C, 141-142

Eye diseases:

- Management of infective endophthalmitis by pars plana vitrectomy, Harris GS, et al, 194-198
- Meesmann's corneal dystrophy: ultrastructural features, Tremblay M, et al, 24-28

- Ocular manifestations of Kawasaki disease (mucocutaneous lymph node syndrome), Jacob JL, et al, 199-202

Eyelid diseases:

- Treatment of blepharitis and blepharoconjunctivitis: comparison of gentamicin-betamethasone, gentamicin alone and placebo, Jackson WB, et al, 153-156

Eye foreign bodies:

- Management of posterior-segment foreign bodies, Howcroft MJ, et al, 256-261

Eye injuries:

- Dog-bite syndrome: an approach to its management, Wise J, et al, 262-265

Eye movements:

- Dog-bite syndrome: an approach to its management, Wise J, et al, 262-265

Eye neoplasms:

- Consecutive bilateral ocular metastases from an asymptomatic adenocarcinoma of the cardia, Rootman J, et al, 79-81
- Factors affecting the survival of patients with lacrimal gland tumours, Wright JE, 3-9
- Hamartomas of the retina and pigment epithelium, Friberg TR, et al, 56-60
- Unilateral proptosis in Nigerians: causes and differential diagnosis, Majekodunmi S, 203-206

Fixation, ocular:

- Adjustable sutures in strabismus surgery, Wise J, et al, 157-160

Foreign bodies:

- Management of posterior-segment foreign bodies, Howcroft MJ, et al, 256-261

Fresh water: see Water

Fungi:

- Bilateral *Candida albicans* dacryocystitis with facial cellulitis, Codère F, et al, 176-177
- Bilateral retinal infarction in disseminated aspergillosis, Johnson R, et al, 223-226
- Macular coccidioidomycosis, Lamer L, et al, 121-123

Fusion:

- Early surgery for infantile esotropia: results and influence of age upon results, Zak TA, et al, 213-218

Gentamicin:

- Treatment of blepharitis and blepharoconjunctivitis: comparison of gentamicin-betamethasone, gentamicin alone and placebo, Jackson WB, et al, 153-156

Glaucoma:

- Anterior segment necrosis following cyclocryotherapy, Sharp DC, et al, 268-270
- Massive subretinal hemorrhage and anticoagulant therapy, Brown GC, et al, 227-230
- Risk factors for progression of visual field defects in medically treated patients with glaucoma, Richler M, et al, 245-248
- Glaucoma, open-angle:
 - Lack of generalized constriction of affected visual field in glaucoma patients with visual field defects in one eye, Werner EB, et al, 53-55

Hamartoma:

- Hamartomas of the retina and pigment epithelium, Friberg TR, et al, 56-60

Handicapped:

- Psychologic management of loss of vision, Rakes SM, et al, 178-180

Hemorrhage:

- Anterior segment necrosis following cyclocryotherapy, Sharp DC, et al, 268-270
- Massive subretinal hemorrhage and anticoagulant therapy, Brown GC, et al, 227-230

Hemorrhage, ocular:

- Subclinical vitamin C deficiency (C), Sheppard N, et al, 44
